

Description

A Leased Line connects your computer or local area network directly and permanently to the internet.

The available bandwidths vary between 128 kbit/s or a multiple of it (flatrated) or 2 Mbit/s (volumebased).

In case you have a local are network, you can connect your current and future servers to the internet (webserver, SMTP-server, FTP-server,...) Also all (unlimited in number) workstations (PC and/or MAC) can be connected to the internet. The XS4ALL leased line provides access to the extremely reliable network and personal guidance of XS4ALL. Due to the severe standards to which the XS4ALL-network is subject, you can even at peak hours enjoy high speed internet traffic. XS4ALL can connect your company to the internet on the basis of maximum bandwidth.

Flatrated fee Prices valid on April 2, 2002

This is the ideal formula for professional use. It enables you to choose a proper bandwidth, according to the needs of your organisation, and it provides access to the internet for an unlimited number of people at a fixed monthly rate. Moreover, there is not limit to the volume of traffic.

In addition, using the flatrated formula avoids financial surprises at the end of the month.

Flatrated	128 kbit/s	256 kbit/s	512 kbit/s
Flatrated fee - excl BTW a month :	from 467,90 EUR	from 666,90 EUR	from 975,90 EUR
(fysical leased line, feed and use XS4ALL hardware)	from 18.875 BEF	from 26.903 BEF	from 39.368 BEF

Volume data traffic Prices valid on April 2, 2002

The volume-based formula guarantees a bandwidth of 2 Mbit/s. You have the opportunity to choose the volume category that best fits your needs (10, 20, 30, ...Gbyte/month). Of course, the monthly volume of data traffic that is actually used should be below the volume of the applied category.

Volumebased - 2Mbit/s	10 GByte	20 GByte	30 GByte	40 GByte
Datatraffic - VAT excl. a month :	from 964,90 EUR	from 1.063,90 EUR	from 1.162,90 EUR	from 1.261,90 EUR
(fysical leased line, feed and use XS4ALL hardware)	from 38.924 BEF	from 42.918 BEF	from 46.911 BEF	from 50.905 BEF

The total monthly cost comprises the flatrated or volume-based bandwidth and the monthly Belgacom costs. □

You are only invoiced by XS4ALL (also for the Belgacom part).

Remarks

- Connecting a leased line always requires a router or other leased line interface/server at the customer's side. Needless to say that XS4ALL can provide the necessary and properly configured hardware.
- In order to calculate an adequate offer for the monthly leased line costs (invoiced to XS4ALL by Belgacom), the customer needs to give XS4ALL the exact coordinates of where the leased line has to be installed (street, number, location).

Do not hesitate to contact XS4ALL for further information or advice. Our sales people will gladly assist you with your questions.
